# Workflow Analyzer

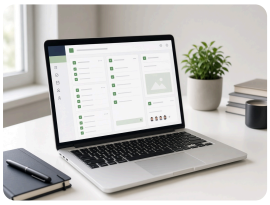

AI Business Improvement Platform

## Work smarter. Keep it simple. Get things done faster.

Workflow Analyzer helps turn everyday business tasks into simpler, faster workflows. You don't need to be a technology expert or know how to use AI. Just follow the straightforward instructions, explore the available AI Workers, and let Workflow Analyzer help take care of the repetitive work.

## Your quick guide to using Workflow Analyzer

### *Explore your AI Workers*

Start by reading through the available AI Workers (AIWs). Each has a basic description explaining what it does and how it can help. Choose the one that suits the job you need to complete.

### *Turn your rough notes into useful job information*

You don't need to prepare a perfect document. Simply provide your rough notes, basic job details or the information you've already collected. AIW-09 helps turn those notes into structured information you can use for the next steps in your workflow.

(AIW-09)

### *Turn your job information into a quote*

Use the appropriate AI Worker to help turn your job information into a structured quote. Review the details, make any necessary adjustments, and save the result.

(AIW-01)

### *Convert your quote into an invoice*

Where the workflow supports it, a quote can become an invoice in just a few clicks. You don't have to start from scratch and re-enter everything. Check the final details before sending.

(AIW-02)

## And there's more to explore

These examples are just a small part of what Workflow Analyzer can offer. Additional AI Workers are available to help with other business tasks, with more capabilities planned for the future.

Whether you're a sole trader, running a small business, managing a growing company or working within a large organisation, the goal is the same: simplify processes, reduce repetitive work and free up more time for what matters.

## Built to keep improving

Technology never stands still, and neither should the way we work.

**Workflow Analyzer will continue to fine-tune its capabilities and grow alongside advances in AI, helping businesses work smarter into the future.**

Our aim is simple: make business improvement easier, more accessible and more useful, one workflow at a time.

## Ready to get started?

You've seen how simple it can be to get started. Now it's time to put Workflow Analyzer to work for you.

**So, sign up and start improving your business!**

Workflow Analyzer — Less busywork. More business.
